Profile

Driven and highly skilled Backend Developer with a proven track record of delivering robust and efficient solutions. Possessing a strong understanding of various programming languages, frameworks, and technologies, I am adept at designing and implementing scalable and secure applications. Committed to continuous learning and staying updated with emerging trends, I strive to contribute my expertise in backend development to drive organizational success.

Work Experience

Backend Developer

- Implemented and optimized scalable backend solutions, resulting in reduction in response time and improved overall system performance.
- Collaborated with cross-functional teams to design and develop RESTful APIs, ensuring seamless data integration and enhanced user experience.
- Conducted thorough code reviews and performed debugging to identify and resolve complex issues, resulting in increased stability and reliability of the backend infrastructure.
- Developed and maintained efficient databases, utilizing SQL technologies, to handle large volumes of data and improve data retrieval speed.

Skills

Programming languages:
Python
Professional

Database management:
SQL
Limited
